PRASANNA GAUTAM

Data Scientist | Machine Learning | Data Analytics

prasannagautam10@gmail.com | +44 7345 251314 | London, UK | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Results-driven Data Scientist currently completing an MSc in Data Science, with over a year of hands-on experience as a Data Analyst and a strong foundation in machine learning, statistical modelling, and business intelligence. Demonstrated ability to translate complex data into actionable insights across diverse industries including travel, IT solutions, and education. Proficient in Python, SQL, and modern ML frameworks. Adept at stakeholder communication and cross-functional collaboration. Seeking a data science role in London to drive evidence-based decision-making and deliver measurable business impact.

WORK EXPERIENCE

Data Analyst — *Aug 2024 – Sep 2025*

D Cube IT Solutions Ltd • Full-time

- Designed and maintained interactive dashboards and reports to monitor KPIs, enabling data-driven decisions across business units.
- Performed end-to-end data pipelines: extraction, cleaning, transformation, and analysis of structured datasets using Python and SQL.
- Built predictive models and applied statistical techniques to identify trends, anomalies, and business opportunities.
- Collaborated with engineering and product teams to define data requirements and deliver analytical solutions aligned with business goals.
- Automated recurring reporting workflows, reducing manual effort by approximately 40%.

Business Analyst & IT Support Specialist — *May 2018 – Sep 2025*

Shristi Tours & Travels Pvt. Ltd. • Part-time

- Analysed booking trends, customer behaviour, and revenue data over 7+ years, providing actionable insights that supported strategic planning.
- Developed and maintained business intelligence reports to track sales performance, operational efficiency, and market trends.
- Managed IT infrastructure, troubleshot software/hardware issues, and maintained internal databases ensuring high system availability.
- Automated data entry and reporting processes using Excel macros and Python scripts, improving operational efficiency.
- Liaised between business stakeholders and technical teams to translate requirements into effective data and IT solutions.

Mathematics Teacher (Secondary Level) — *2020 – 2023*

Bethany Boarding School • Part-time

- Taught secondary-level mathematics including algebra, statistics, and probability — core foundations of data science.
- Developed structured lesson plans and tracked student performance metrics to personalise learning outcomes.
- Strengthened ability to communicate complex quantitative concepts clearly to non-technical audiences.

EDUCATION

MSc Data Science with Professional Experience — *Current*

University (ongoing) — Expected Completion: January 2028

- Advanced modules: Machine Learning, Deep Learning, Statistical Modelling, Big Data Analytics, Data Visualisation.
- Developing expertise in applying cutting-edge data science methods to real-world business problems.

BEng Computer Engineering — *Graduated 2024*

Pokhara University

- GPA: 3.90 / 4.00 — Dean's List recipient.
- Key modules: Programming, Data Structures & Algorithms, DBMS, Machine Learning, Artificial Intelligence, Mathematics.

TECHNICAL SKILLS

Languages	Python, SQL
ML / AI	Scikit-learn, TensorFlow, OpenCV
Data & Viz	Pandas, NumPy, Matplotlib, Seaborn
BI & Cloud	Power BI, Microsoft Azure
Databases	MySQL
Dev Tools	Git, GitHub (version control)
Soft Skills	Analytical thinking, Stakeholder communication, Problem-solving, Team collaboration

KEY PROJECTS & ACADEMIC WORK

- Machine Learning & Predictive Modelling — Built end-to-end ML pipelines using Scikit-learn and TensorFlow; applied regression, classification, and clustering to real-world datasets with full EDA using Pandas, NumPy, Matplotlib, and Seaborn.
- Computer Vision Projects — Developed image processing and object detection solutions using OpenCV and TensorFlow, applying deep learning techniques to visual data.
- Data Analytics & Visualisation — Created interactive dashboards in Power BI and Python (Matplotlib/Seaborn) to communicate insights from structured datasets to business stakeholders.
- Cloud & Database Projects — Worked with Microsoft Azure for cloud-based data workflows and MySQL for relational data management and querying.

All projects available on GitHub: github.com/prasanna2056525

ADDITIONAL INFORMATION

- Languages: English (professional), Nepali (native)
- Location: London, UK — eligible to work in the UK.
- Interests: Data science competitions (Kaggle), open-source contributions, applied mathematics.
